## Summary

Software Engineer with experience in backend development, serverless applications, and cloud-based systems using Node.js, TypeScript, AWS Lambda, Prisma, Aurora PostgreSQL, DynamoDB, and Redis. Hands-on experience building APIs, batch processes, database migrations, and infrastructure components for e-commerce, Web3, and vehicle-connected platforms. Strong focus on clean implementation, testing, and delivering reliable features across API, infrastructure, and database layers.

## Technical Skills

**Languages:** JavaScript, TypeScript, SQL  
**Backend:** Node.js, NestJS, Express.js, REST API, AWS Lambda, Prisma, TypeORM  
**Frontend:** React, Angular, Redux Toolkit, Ant Design, React Hook Form  
**Databases:** PostgreSQL, MySQL, MongoDB, Amazon Aurora, DynamoDB, Redis  
**Cloud & Tools:** AWS, AWS CDK, S3, SNS, Docker, GitLab CI/CD, GitHub Actions  
**Testing:** Vitest, Jest, pgTAP

## Education

## Project

---

### **Y-Connect Gen2 Vehicle-Connected Platform** | *Node.js, TypeScript, AWS Lambda, CDK, Aurora PostgreSQL, DynamoDB, Prisma*

- Developed backend APIs and serverless services for vehicle data, riding history, maintenance, notifications, ranking, file upload, and user-related features.
- Implemented AWS Lambda batch processes for legacy data migration, riding file processing, maintenance status updates, ranking data generation, and large-scale data registration.
- Worked across API, Infrastructure, and Database repositories; contributed to AWS CDK components, Prisma schemas, Aurora migrations, stored procedures, DynamoDB definitions, seed scripts, and tests.

### **Lashinbang EC-CUBE Migration Platform** | *NestJS, TypeScript, TypeORM, MySQL, Redis, AWS S3, React*

- Migrated legacy EC-CUBE/PHP features to a NestJS-based API server, rebuilding customer, mypage, order history, point card, store/news, arrival, and purchase-related APIs.
- Implemented Redis-based session authentication compatible with legacy EC-CUBE session data, enabling shared login behavior between the old system and the new API.
- Developed Denpyo and Kaitori workflows, including purchase slip registration, detail retrieval, signature submission, document image upload to AWS S3, barcode generation, and status updates.

### **Vessel Schedule Service Platform** | *React, TypeScript, Vite, Redux Toolkit, Ant Design, Leaflet, i18next*

- Developed multi-portal frontend applications for a vessel schedule and shipping management platform, including public, admin, and shipping-company portals.
- Built features for vessel schedule search, schedule by port, live vessel map, past track display, domestic vessel schedule management, port events, notifications, reports, and public API management.
- Integrated Leaflet/React Leaflet for AIS vessel map visualization, i18next for multilingual support, React Hook Form and Zod for form validation, and Redux Toolkit for shared application state.

### **Stake Vault Portal** | *React, TypeScript, Wagmi, Viem, NestJS, ethers.js, Web3, TypeORM*

- Developed a Web3 staking portal with wallet connection, signed-message authentication, staking dashboard, validator list, reward overview, and classic/NFT staking flows.
- Built NestJS backend APIs for wallet-based login, JWT authentication, user profile management, email verification, admin login, and validator data retrieval.
- Integrated ethers.js and Web3 to verify wallet signatures, connect to Ethereum RPC providers, read smart contract events, decode transaction data, and sync staking-related blockchain data.

## Certificate

---

**TOEIC - Test of English for International Communication**

Score: 650

Apr 2024 – Apr 2026
